IMPORTANT: READ BEFORE USING PRODUCT

HOW TO USE:

1- **FOR BEST RESULTS, USE LITHIUM AA BATTERIES. THEY WILL PROVIDE MORE POWER THAN ALKALINE AA BATTERIES**
2- Unscrew bottom and load one "AA" battery **(+ side first)** into the iTurbo.
3- Screw the bottom until the blue light turns on to test the battery.
4- Unscrew until the light shuts off (OFF position)
5- When not using the iTurbo leave the unit in the off position to preserve battery life.
6- Connect the adapter for your iPod to the top of the iTurbo.
7- Tighten bottom all the way so the blue light illuminates (ON position)
8- Connect the adapter to the same place on your iPod where you connect other charging adapters. **Do NOT force the adapter. Doing so may damage your iPod.**
9- The blue light will illuminate to full brightness indicating your iPod is charging. You can now use your iPod.
10- When the blue light is extinguished or becomes very faint, unplug iTurbo and replace "AA" battery before charging again.

IMPORTANT TIPS FOR OPTIMAL CHARGING:

- If your iPod battery is dead, it could take several minutes to recharge the iPod in order for it to be operational. The best results can be achieved by connecting the iTurbo at the first indication of a low battery.
- The iTurbo can provide a quick charge in just a few minutes, a more efficient charge can be achieved if the iTurbo is allowed to charge uninterrupted (iPod off) for 30-40 minutes.
- **When the blue light goes out disconnect the iTurbo immediately** and replace the "AA" battery
- **Do NOT** leave the iTurbo connected over night.
- Replace "AA" battery if blue light fails to illuminate.
- Video iPods will operate more efficiently with a lithium battery.
- When in use, the iTurbo may feel very warm to the touch. This is normal and indicates the iTurbo is working at maximum efficiency.
- If your iPod is not charging, simply re-set your iPod by following Apple's instruction

LIFETIME GUARANTEE:

In the unlikely event that your iTurbo damages your iPod battery at anytime, we will replace your iPod battery free of charge. This lifetime guarantee is activated when you mail in the attached registration card. To have us replace your damaged iPod battery, simply send us: (1) your iPod, (2) the iTurbo that caused the damage, (3) the UPC bar code from the package, (4) the sales receipt from your purchase of the iTurbo, and (5) your mailing address in the U.S. to: Adrenaline Technologies Inspection Dept., 125 Commerce Drive, Hauppauge, NY 11788. This lifetime guarantee is not valid if the iTurbo has been tampered with or altered in any way or if the damage to the iPod battery is attributable to any other cause.
